PIONEERING COMPANY IN THE NATIONAL MARKET

COMPREHENSIVE ORAL RE-HABILITATION SYSTEMS

RIGOROUS AND SELECTIVE UNIT CONTROL

DENTAL IMPLANTS OF THE HIGHEST QUALITY AND PURITY

Aiming for quality

Microdent, founded in Barcelona in 1983, is a pioneering company in the national market in the development, manufacture and commercialisation of integral systems for oral rehabilitation, constantly geared towards professionals who demand the highest quality and precision.

By choosing Microdent implants you are placing your trust in a great company with a hard-earned, successful track record and the support of many of the world's most renowned implantologists.

Over the course of these more than thirty years of work, Microdent has stood out for its research, collaborating with many national and international universities, participating in numerous scientific projects and publishing articles in specialised journals in the sector.

Choose the Microdent seal, since 1983

At Microdent we ask ourselves how we can get closer to our clients and we like to present ourselves from a different perspective; to show what is behind a brand that has been in the sector for more than 30 years and that, without a doubt, is different in many ways from the competition.

Technology, innovation and professionalism

At Microdent we achieve the highest levels of compliance with the requirements demanded by our customers, ensuring that all our products comply with the strict regulations established by the international health authorities thanks to a rigorous and selective unit quality control. Highlighting, in this regard, the quality of the raw materials used, such as the titanium selected for the manufacture of dental implants, of the highest quality and purity.

The production processes, evaluated and validated by the international certifier IMQ, meet the highest quality standards, which accredits Microdent with the corresponding CE mark for medical devices as well as the international certificates ISO 13485, ISO 9001 and the recommendations of ISO 10993 in terms of cytotoxicity, implant surface residue, intra-cutaneous reactivity and systemic toxicity.

MICRODENT EXPANDERS

Creators of the atraumatic threaded bone expansion technique in 1997

HIGHLY QUALIFIED TECHNICIANS

INTERNATIONAL
EXPORT PLAN

The Team

At Microdent we have a complete team of highly qualified technicians, specialised in each of the areas of expertise, at the service of implantology professionals, as well as a complete commercial network throughout the national territory. Microdent has also established commercial relations with different countries around the world, consolidating a remarkable export plan that bases its communication strategy on brand value. Therefore, managing to open up markets and achieve greater international recognition.

WE GUIDE THE CLINICIAN IN HIS OR HER LEARN- ING PROCESS

ALL LEVELS OF SKILL

Continuous Training

Microdent has always shown a special concern for training, organising a range of clinical courses, seminars and practical workshops on an itinerant basis to provide implantology professionals with the knowledge and tools necessary to achieve success in their work with patients.

Theoretical and practical training designed for all skill levels and supported by a full scientific committee and collaborating teachers who act as a reliable guide to help participants gain a deeper understanding of all branches of the sector.

Microdent is now leading a Continuous Training project with the clear objective of guiding and accompanying clinicians in their learning and updating process, addressing all areas of implant dentistry in its efforts to consolidate a model based on excellence.
